

# POWER TECH EARTHING SOLUTIONS

We The POWERTECH EARTHING SOLUTIONS are Prominent Manufacturer Duly enlisted under Micro and Small Industries for manufacturing of Chemical Pipe Earthing (Based on G.I., Copper Bonded and Pure Copper). Our systems are precisely designed to ensure that any fault developed in the electrical systems does not cause any accident by safely dissipating the high magnitude currents to the ground. We do not compromise on the quality of the material that we provide thus making it sure that our earthing systems last long and require no maintenance.
